A potential energy surface (pes) describes the energy of a system, especially a collection of atoms, in terms of certain parameters, normally the positions of the atoms. The surface might define the energy as a function of one or more coordinates; if there is only one coordinate, the surface is called a potential energy curve or energy profile. Example is the morse/long-range potential. Non-formal learning: mapping the conceptual terrain. a consultation report in this piece helen colley, phil hodkinson & janice malcolm provide a very helpful overview of different discourses around non-formal and informal learning and find that there are few, if any, learning situations where either informal or formal elements are completely absent. A systems approach to the study of human behavior. citation: huitt, w. (2012). a systems approach to the study of human behavior. educational psychology interactive.
